STAR ROUTE INVESTIGATION.

Special Agent Glbson makes his Report VAST ARRAY OF UNPLEASANT FACTS.
FOR BRADY.

Washington, Nov. 21.—A. M. Oibson, special at-rney for the United States in the matter of the

practice; that postmasters who have been accessory to these frands have time and time again violated the law and regulations of the department and have not toen even rebuked, and some of them to day are still in often.

Fourteenth—That in making extra allowances Second Assistant Postmaster General Bridy reversed the practice of the department, which had ravely if ever been departed from during more than 50 years, and violated the lefterland, splitt of the law by accepting as sufficient statements of contractors as to the cost of performing additional service, when these statements, tested by common sense or ordinary judgmast were not only manifestly false but altogether insufficient as data upon which to base ever approximate estimates.

Fittenuth—That there has been inclicions and dereliction of duly and still graver chical shorter manifest of the conduct of the contract office of, the postoffice office; that goese abuses and manifest corruptions in the conduct of the contract office of, the postoffice department in the past could, have been impossible had the anditor of the treasury for the postoffice department yigorously executed the law with honest purpose to correct glazing, wrongs and bring to justice noturfous wrong-deers.

The decoments would till twenty newspaper col-

ind the suditor of the treasury for the postoffice department vigorously executed the law with honest purpose to correct glaring wrongs and bring to justice neturious wrong-doers.

The documents would all twenty newspaper columns, exclusive of "grabbits," dealing chiefly with the administration of the contract office during the term of General Brady. Obsen reports: "In one of the niost profligate years of Buchanan's administration, when the postoffice department hecame almost a synonymous term for public robbery, I find but one case of an expedition allowance. Coming to recent times, it is asserted fluore were only six cases of expeditions, involving a total of \$21,738, in the fiscal years 181-1, and only seven, amounting to some \$61,900, during the fiscal years 1875-6, when General Tyner was in charge of the office, and in each of these cases the orders making allowances state they are less than pro rate, that is, the ancient custom in accordance with the frue co natraction of the law was observed."

The report continues: "During Brady's dret fiscal year I find on his jorders sixteen allowances for expedition of mall service on gixteen routes aggregated \$184,544 per summing allowances for expedition finerwised the pay on these routes 1927-346, and made the total pay \$382,00 per year. In each one of these cases it was stretched to its utmost in two red contractors and instructions that the law rade disregarded, as likewise the time homored custom of the department requiring contractors to furnish verticel detailed data whereby the exact proporation between the original pay and compensation for expeditional survice required could be accurately determined, During the Same of the during the first part of the same allowed for expedition, &c., a

Killed Over a Card shame.

San Francisco, Nev. 21.—Light evening while several men were engaged in a game, of cards in a brandinavian house, No. 418 Prumin street, a dispute arose in relation to a hand which had been object. Robert Smith, an outsider who had no interest in the game, gave his opinion about the hand, when Lawrence Melchoir, one of the play respoke and asked Smith what he had to say. One work brought or smother, and each threatened to strike the other, or smother, and each threatened to strike the other, but they separated, without blews. Shortly after, but they separated without blews. Shortly after, Smith returned and renewed the quarrel. Melchour drew a revolver and fired two shots. One of these missed Smith, but the other struck him. In the left temple and he fell. The men who witnessed the shooting allowed Melchoir to wask out of the preinters without making an effort to detain him. Series without making an effort to detain him. Series without making an effort to detain him. Series of the wind officer Hall, who reached the house a few minutes after the shooting, went in search of Melchoir and found him on lackson street, near Davis. They arrested him and locked him up it. North Harbor pc lice station to await the result of the wound indicted. They conveyed the wounded in an to a receiving hospital, where the police surgeon, who examined bim, pronounced the wound nortic. Santh ded of his injurice at a quarter part 11 o'clock hast night.

The total amount of bonds continued at 314 per cent. is \$579 560,050, and the total cost to the cost of making the exchange of about \$45,-000,000 of the bonds in London. The whole bonds was \$17 81. The bill before congress, which failed to become a law, proposed to appropriate one-quarter of one per cent. for expenses of refunding, which would have amounted to \$1,448,900, as against less than \$10,000 by Windom's plan. As a part of the refunding measures of con-

cept a 3 per cent, bond, a bill passed the senrevenues of the government \$5,569,486, as worth the name to shop fer all its money. shown by the receipts of 1880. The house gress, for like reasons, reported favorably a burred visit, says in his characteristic way: also the two-cent stamp tax on bank checks. The Indians are not as bad as you think; they quarter of 1 per cent. for expenses of the 3 afraid there of being put in the penitentiary.' per cent. refunding measure, amounts to \$10,-

The difference between a 3% and 3 per cent. bond on the entire amount of bonds refunded is \$2,897,800 per annum, which deducted from the total of \$10,125,599, as above stated, shows an average to the government for the first year of \$7,227,799 by Secretary Windom's operathe last congress. And as it was proposed by man lesting great interest in the search for the the house committee of ways and means to reduce the annual revenue derived from banks. England will participate in the search next \$8,676,699 in order to induce the banks to take year. a 3 per cent, bond, the 84 per cent. plan of Secretary Windom shows a permanent advantage of \$5,777,899 per annum to the government over the measures proposed by the ways and means committee of the last house of representatives. Another advantage of this measure over that proposed by congress is that the loan is payable, at the discretion of the government, and hence may be paid at any time the government has funds, whether it be this year or a hundred years hence.

A SCIENTIFIC DISCOVERY.

Few people would expect to find much that. was interesting in a study of the habits and services of the common earth worm. Prof. Darwin, however, has, after much study of the characteristics of these little inhabitants of the earth, obtained a vast array of facts, both interesting and instructive, concerning them. He claims that these oreatures are among the most useful of all of the various forms of life existing on the globe. He has been studying them for over thirty years, and now presents the substance of his researches to the world. He claims that to their indefaigable industry is due the existence of much fertility of the sarth. The v mould which makes soil so fraitful is largely due to their labors, as their food is common dirt, which is eaten and digested by them to a remarkable extent. Prof. Darwin by investigation found that in one field in the county of Kent, England, eighteen tone per zore had been thrown up in one year. Their sotivity is the stalls in the city boarders sent to owners prodigious. The naturalist says that the windered is represented by them is the stall linds for hire at all linds.

Weight of soil rendered serviceable by them is mormous and inconceivable. He dearns also that they have been mainly instrumental in preserving many of the treasures of ancient art and architecture to us, the digested earth preserving whatever it is deposited upon. Had it not been for this energetic morsel of creation the buried tressures which Layard and Schliemann have brought to light would have periabed forever. Among other facts, it was certained that the earth worm is unable to hear or smell and has just enough consciousness of light to wish to get away from it; and what will be pleasant news to tender hearted fishermen, it is insensible to pain. Prof. Darwin's researches in this direction may result in raising the subject of his study in the estimation of the human race, so that the angler may no longer be the only person who will take an interest in the sarth worm.

Many attempts have been made to assign a remon for the recent speculative movement in confederate bonds. The most intelligible one yet presented is furnished by a southern senstor as Washington, who is said to have opporfunities for accurate information on the aubject. He says that the object of these recent purchases was to get the coupous maturing on July 1, 1865, with the bonds attached as conchers. The interest upon these bonds was paid by the confederate government from funds alleged to be in the Bank of England on January 1, 1865. The rebellion collapsed the following April; consequently the July coupons when due were not presented for payment. It is understood that English and American operators who have the handling of the remnant of the confederate funds deposited in Europe have made arrangements for the payment in full of the face value of these coupone, and are now having them cashed in full on presentation. The manipulators not being able to purchase the bonds, with the 1885 conpons attached, in a secret manner, owing to the fact that the holders are widely scattered. advertised for them, tendering to pay \$1 or \$2 per \$1000. Washington bankers say that the cablegram from London to the effect that no All these we Prepare and Recommend to the

The tunnel by which England and France Country orders sollened. This firm received in First Franchism at the Mechanics' Fair. are to be united and the disagreeable crossing the channel on steamors avoided is progressing satisfactorily to everybody. Preliminary drifts have been pushed under the bed of the ocean for more than a mile on either side, and only soft dry chalk encountered. The machine used for cutting goes ahead at the rate of about a yard an hour. The tunnel at first will be between seven and nine feet in diameter, but will be enlarged for railroad purposes. The distance in a direct line from one end of the tunnel to the other will be about eighteen miles, but in addition there will be about a mile and a quarter descent from either shore to the bottom of the shaft, which will be about 300 feet deep, from which depth there will be a slope for some distance and then a level until the coast is approached, when the incline will be again upward. The thickness of the chalk underlying the channel is found to be 500 feet from the point of departure on either side. The whole work will be completed and trains running through inside of two years. The tunnel will be lighted with electricity, and the air will be kept perfectly fresh by an excellont system of ventilation. Trains will cross in from thirty to forty minutes.

In a letter printed in this paper a few days ago it was stated that Mr. F. Paxton, a student in Gov. Thayer's law office, was selected as appraiser of land on which money from the school fund was lent to Gov. Thayer's son,

NEWSPAPERHICHVE®

The intimation was that Paxton was selected in order that the land might be appraised above its value, so that more money could be obtained ou it than it was justly worth. Inquiry develops the fact that Paxton was not selected as appraiser for this particular case, He is commissioner for the university fund for this county, and was appointed by Judge Stott. The appraisument was made by him in his official capacity. The sum of \$2500 was leut to Claude Thaver on the lane, which has since a political quarrel had prevented any result. M. Wiberg) assuming payment of the school been sold for \$5000 cash, the purchaser (Mr. C. 1 Large part or the national debt was maturing, fund mortgage. We see no just ground of con plaint against Mr. Paxton in the matter.

sought, and the result of Mr. Windom's opera- board which has drawn up and presented to the tions has been a greater saving to the gov. secretary of the navy a plan for supplying the ernment than could have been effected had United States with a navy. At present, acthe refunding measures which were before the core ing to the board, we have but twenty-one war vessels that are efficient, or that can be made so. It is therefore proposed to build the government was about \$10,000, of which speed of 15 knots; six of 4200 tons, with a nearly \$6000 was for paper and printing the speed of 14 knots; thirtoen of 3500 tons, with bonds and for all other expenses, including a speed of 13 knots, and ten of 770 tons, with a speed of 10 knots. The latter are to be built of wood, and the others of steel covered with expense of continuing each \$1,000,000 of the wood. The cost of this new navy is to be \$31, 100,000, and it is estimated that it can be made ready for sorvice in eight years. But not one of the proposed ships, built on the plan indicated, would be able to encounter the powerful armored vossels of foreign nations. We ought to have a navy, but the country has no confidence that it will be protected from Tea Sets, gress and in order to induce the banks to ac. corrupt jobs in creating one. How far is it to Paradi my Time loiters and my heart it flies

Whene'er I go that way."
-Et en M. Hutchi sso. Don't Bury me Beep

The following touching story father, whose sick little girl called him to her bedside just before she died, and said: Papa, when I die don't bury medeep-not more than so deep, holding up her tender and emaciated and measuring from her shoulder out. Oh it is so hard to be put down so very dec on his so hard to be put down so very deep in the cold, damp ground, and please don't place any marble slab on my grave; t will press so heavily upon my I title breast. Sad i my grave nicely, and plant a tree at its head, so that the wild birds can gather in its branches and sing for me." After a pause she continued:

"But it seems to me! I would be the here of the continued in growth meater to the heart, and the liver appears to wards the fifth day.

At the end of seven hours more we see the lungs and stomach and, with wooderful rapidity, are developed, four hotre afterwards the intestines, the lungs and the upper Jaw. At the 144th hour two ventricles are visible, and two drops of blood instead of a single drop which we had seen previously. The seventh day the brain begin to have some consistency; and at the 119th hour of incubation the bill opens and fiesh appears on the breast. Four bours after the breast bours is seen, and in als hours after the ritis appear, forming the back of the chicken; and the bill is distinctly visible, as well as the gall bladder. The bill becomes green at the end of 236 hours, and if we remove the chick from the shell it evidently moves fiself. At the 200th hour the eyes appear, and 88 Fours after the ribs are perfect. At the 33st the spleen draws pear the stomach and the lungs to the chest. About the fitteenth day the bill frequently opens and shuss; and, a careful listener can each the amothered cry of the imprisoned chick at the and of the eighteenth day. But it seems to me I would rather have our own birds sing for me than the wild birds. Couldn't you let brother Willie and sister Emma bring our cage of little birds out to the cometery every Bunday morning and leave thom to sing for me all day? When you are all at church in town it won't seem so lonesome out there by myself." A few days after this the little child died, and her affectionate father did everything she requested. She was buried shallow, the grave nicely sodded and a tree planted at its head. And still every Sunday morning Willie and Emma can be seen going out to the cometery with their cage of little birds to her grave.

FINANCE AND COMMERCE

The story of the wheat market during the week ading to-day is easily told. The market has been shippers have not been anxious to buy and holders not anxious to sell. This is the situation, and there are no immediate prospects for change. The market at Liverpool continues "off" and to ecline, which fully counteracts the constant weakening of freights here. ENGLISH MARKETS.

Ayer's Agno Oure is the only medicine in existence which may be considered an absolute autidate for fever and ague and kindred diseases. It not only affords immediate relief, but it eradicates the malarial potent which produces the disease, with sut leaving any enervating or injurious effect, as is the case with many of the ague medicines advertised. The Mark Lane Express, in a review of the British grain trade for the week ending last Monday, says: The weather is abnormally warm and young wheats have consequently made rapid progress. Deliveries decreased both in quantity and qualities. The weather is favorable for threshing. Good samples milive wheat are scarce and all but very few well with increased difficulty. Most samples were rejected. There is no quotable change in values. Flour-Foreign trade unchanged; some concretion sary to effect sales. American red winter and spring wheats are in large supply in London. Receipts of foreign flour small, half being from New, York. Steadiness is due to the restricted supply. Rates are unchanged. Fourteen wheat cargoes arrived off coast, and thirteen were sold. The floating bulk has decreased. Good barley is scarce. In ferior id more plentiful. Maize, unchanged, but mixed Asterican firmerand in good demand Sales of English wheat during week 41,911 qr at 458 4d per qr. against 40,982 qre at 418 10d per quarter orresponding week last fall,...

PREIGHTS There have been no engagements of vessels since our last review, so it is impossible to give apparate quotations. The four or five ships in the market ten days ago are still offered, but do not find takers The market is gradually but steadily weakening. We doubt if more than 75s could be secured for vessel to load for U. K. Rente Protúce Auritet.

Owing to the unsettled condition of the wheat market, flour is a triffe, weaker. Oats are very firm at quotations. Advices from California indicate that prices will rule high there all winter. There, is a prospect for an advance here. The demand for export is small. Choice milling oats, especially of the "surprise" variety, are wanted. There is no grand tonic and change in mill feed. Bran is wanted, and the prevalling cold wasther may advance the price. Cured meats continue firm. No change, however, a quo tations. There is great demand for good Oregon hams; but the market is almost entirely bare. Choice aids most is particularly wanted. Owing to the large demand for Whittaker hame, the supply has been exhausted. The demand here is almost entirely emphiled with California meet. There is no change in lard. Dried apples continue firm: Offe ings were freer last week than for some tim: past. There is absolutely no demand for dried plums. Hope are a triffe weaker owing to reports from Califormin of sales of choice Oregon at 21 cents. Hides are weaker all round, though quotations rems a unhanged. Butter having dropped in Call ornia there has been no advance here as was expected. It is firm at outtations. There is no change in onions. Small receipts of eggs during the past week rdinary demand for Thanksgivit g has maintained high prices. The supply is not buil and is expected to advance shortly. Receipts be applied during the week have been large. Chalce red ples during the week have been large. Ch arieties find ready sale at top prices. There is but littlestemand for pears except of the "Winter Nel-Ha" Variety. Receipts of chickens have been large during the week and prices continue low. The demand for Thanksgiving turkeys has been fully suppilled. Some few poor lots were sold below the market price. There is a very good demand for seese. Fat unplucked geese will bring more than quotations. It is a mistake to pick geese as it afects their market value. Salmon is unchanged. The San Francisco market shows decided improve-

ment in potetoes and prices have consequently ad-FLOUR Standard brands \$5; country, \$4 25@4 75; TLOUR—Standard brand Sc; country, \$4 70-94 (b); superfixe, \$5 7894.

EGG AND CHICK. The Wonders of Incubation

the imprisoned chick at the end of the eigh

For the remaining three days it grows continually

for the remaining turned and a light work contains describing the finishing turches to lits various or gans and to the silken color of down which envelops the tiny creature from glossy beak to tender drumstick. Strength comes with all the accelerated forces of quickening life, and a few strokes of the powerful bill sets the pretty prisoner free, and his after life and prosperity is something with which we as the context have more or less rouncition.

owners have more or less connection.

be said, and it is said so well, that we quote it with the hope that our sensible girl chicken during the orocess of incubation, from the day in which the nother ben begin; her hadions term of setting to the moment when the downy hiped bursts the shell and enters on life as an antwill take it to heart. "Many a girl." save the paper named, "is careless as to how much money a young man spends for her. Three terri of setting to the moment when the down hipself bursts the shell and enters on life as an antimate and findependent existence. In he parsuit of settence and the interest of learning is seeming destruction of material is of any no meet, and we first no economical poultry raiser will accome us of exitavagance if we remove each day or oftener of the swenty-one days required for the perfection of the chicken, a simil ergx, and show you (as far as we can independ no prompted for the perfection of the chicken, a simil ergx, and show you (as far as we can independ no nor barnyards are made.

Ull course the germ of life is in the legg from the beginning, as to amount of warmits and quiet will produce a bird from a sterile erg, but with this fact assived the hen has sat on her eggs intarily teelth hours before we find some lineaments of the head and body of the chicken. The heart may be seen to bear at the second day and their faint prelative and the interest of the great artery. About the firenth hour one aurelies of the heart sphears, resembling a loop folded down upon Itself. At those and for the red first had the other than one for the bill and the other matringe would be very and to the including hours of the strings are seen, two of the including that the heart, and the liver appears to wards the fifth day, it will be liked to first heart sphears, resembling a loop folded down upon Itself. At those of the fresh hour one aurelies of the heart sphears, resembling a loop folded down upon Itself. At the of the fourth day the interest of the great artery. About the first pheartical and the first pheart sphears, resembling a loop folded down upon Itself. At the of the fourth day the auricles of the pears to the fourth day the auricles of the pears appears to the fourth day the auricles at the of the fourth day the auricles at the of the fourth day the heart appears to work the first and the liver appears to wards the fifth day,

There is so much need for something like

TO TOP OFF A DINNER,

May be Drank Clear, as a Cordial. thoroughly appointed, the good old way was to wash down the last triumphs of the feast with copious libations of rich; rare and curious old Port and Golden Sherry; but "HUB PUNCH" has added a new sensation to the epicure. Its delicacy, aroma, flavor, and delicious, but gentle effects, proclaim it the nectar fit for the gods banqueting on Olympus. Mix HUB PUNCH with Ice Water, Cold Fea, Lemouade, or Soda. It is unanimously pronounced unrivalled.

TESTIMONIALS.

ious beyond description."—Boston Transcript Added to the good thingsof the table it enlarges the saures of life and encourages good followship and od nature if rightly enjoyed. —Springfield Republicas. "Invaluable for a little treat when a friend dropsin." were fore remay ross.

"It is a great trouble to make Punch, and many people lask the secon faire to breet it. Hub Punch is includence wherevore known."—Spirit of the Tunc, N.F.

"The increasing popularity of Hub Punch is pleasant." mony to your success in using the lest and pursonents." PARK & TILFORD, New York. "Our mocessin selling Hub Punch has surprised us, we having sold within the past three months larger quantity than we anticipated selling in twelve."

BMITH & VANDERBEEK, New York and Chicaga.
